

FOR IMMEDIATE RELEASE
TRX-4 LIGHT KITS

LIGHT UP THE TRAIL

TRX4

LED Light Kits

Complete LED Kit (#8030) includes:

- LED light bar
- LED rock light harness assembly
- LED headlight/tail light harness assembly
- LED lighting module
- 3-in-1 wire harness
- Required hardware and zip ties

Hit the trail day or night with rock-solid reliability

Genuine Traxxas LED Light Kits for the TRX-4 are engineered with the same outstanding quality and attention to detail as the truck itself. Precise Traxxas fit and finish makes installation easy and fun for any skill level, and the waterproof design allows for all-weather adventure after the sun goes down.

TRX-4 LED Lights are available as a complete kit or as individual components, allowing TRX-4 owners to select the exact setup that meets their needs.

- Sealed waterproof design
- Engineered by Traxxas for direct fit on the Land Rover Defender body with tidy and secure wire management
- 3-in-1 wire harness operates all lights with a single connection between body and chassis
- Traxxas LED lighting module
 - Regulated to provide consistent and reliable power output with batteries from NiMH to 3S LiPo
 - Eliminates overheating, glitching, and other electronics issues common with unmatched aftermarket systems
- Integrated High/Low brightness switch provides two output levels for the RIGID® Light Bar and the headlights

Individual LED Light Kit Components *(details on page 2)*

- Light Bar (#8025)
- Rock Lights (#8026)
- Headlights/Tail Lights (#8027)
- LED Lighting Module (#8028)
- LED Lightbar & Lighting Module (#8029)

LED Light Kit Components

WATERPROOF

LED Light Bar with High/Low Brightness Switch

Designed to the rigorous standards of both Traxxas and leading lighting manufacturer RIGID®, the LED light bar utilizes surface mount LED technology and a custom clear lens for unsurpassed realism. The integrated switch controls the brightness of both the light bar and the headlights. The light bar bolts directly to the Land Rover Defender ExoCage, but the universal mounting tabs also allow easy custom installation on a variety of surfaces.

Available in: #8030, #8029, and #8025

WATERPROOF

LED Headlight and Tail Light Harness

Designed specifically for the Land Rover Defender body, the LED headlight and tail light harness is a direct replacement for the factory lens components. Fourteen total bright white LEDs bring the headlights to life, while secondary lights illuminate the amber parking lights and red tail lights for a true scale look.

Available in: #8030 and #8027

WATERPROOF

Light up the trail with LED Rock Lights

Traxxas LED Rock Lights install directly into the inner fenders of the TRX-4 and are positioned to help illuminate obstacles for trouble-free nighttime crawling. The kit includes two LED modules per wheel, ensuring a flood of light throughout the underside of the truck. Down lighting in the wheel wells combined with the headlight/taillight kit make it easy to see the orientation of the vehicle in the dark.

Available in: #8030 and #8026

WATERPROOF

Lighting Module Provides Stable Power Pack After Pack

Adding LED lighting components to your TRX-4 is simple with the Traxxas waterproof power supply. This unit provides stable, regulated output with batteries ranging from NiMH to 3S LiPo. The power supply connects to the receiver and electronic speed control to provide single-point control of your lighting components. The lights turn on when the receiver is powered on. The included 3-in-1 wire harness allows the full lighting setup to be connected with a single plug.

Available in: #8030, #8029, and #8028
